PROFILE INFO

I am 26 years old, I was born in South Korea and I currently reside in Denmark with my partner. I hold a residence permit under the EU regulations, which entitles me to live and work in Denmark. I have a bright and outgoing personality, I consider myself a fast-learner and I am passionate about web development. I have experience in working on projects in teams as well as individually. As a personal project, I created a website for an imaginary e-shop Unico that showcases various skills I learned. I have a background in visual design and completed a 920 hour coding boot camp. I have improved my English skill through working and traveling in Canada for 6 months.
