FullStack Developer | EU residence and work permit holder

2300 København S, Denmark | junbeom2.woo@gmail.com | +45 44 11 14 18 | junbeomwooo

PROFILE INFO

I am a full-stack developer based in Copenhagen. I bring a strong technical foundation across frontend and backend, along with UI/UX skills from my design background. This helps me bridge the gap between engineering and design and build intuitive, scalable solutions. I am driven by passion and love tackling new projects while ensuring my work meets high standards. Moreover, I am positive, friendly, and dedicated to exploring my limits and going beyond them.

WORK EXPERIENCE

Spuddle, Denmark

Full-Stack Developer
Mar 2026 – Present

- Own features end-to-end across React Native and Hono/PostgreSQL
- Build multiple interactive question types across UI and backend schema
- Build REST APIs and type-safe schemas, keeping frontend and backend in sync
- Configure staging and TestFlight deployment for the mobile app
- Migrate the mobile test suite to Jest, establishing testing setup for shared logic

Frontend Developer Intern
Dec 2025 – Mar 2026

- Developed reusable components and custom hooks for maintainable code
- Built ore app UI and screens with React Native and TypeScript

Inværse Social ApS, Denmark

Mobile Developer Intern
Sep 2025 – Nov 2025

- Led the initial app migration to Flutter and architected the system from scratch
- Designed and implemented the mobile UI and core application features
