PROFILE INFO

I am a frontend developer based in Copenhagen. In addition to my frontend experience, I bring a strong technical foundation in backend development as well as UI/UX skills from my design background. This helps me bridge the gap between engineering and design and build intuitive, scalable solutions. I am driven by passion and love tackling new projects while ensuring my work meets high standards. Moreover, I am positive, friendly, and dedicated to exploring my limits and going beyond them.

WORK EXPERIENCE

Spuddle, Denmark

Frontend Developer Dec 2025 - Present
